If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brian Steed on 7/16/2008.

The application has been amended as follows:

Please replace **claim 28** with the following:

Claim 28. A system that visualizes web site activity traffic, comprising:  
program modules embodied on a computer-readable storage medium, the  
program modules including the following components:  
a monitoring component that obtains information related to  
browsing activity of users visiting a web site;  
a component that analyzes the information and parses the users  
into one or more user groups based on the analyzed information; and  
a visualization component that graphically presents user browsing  
information in one or more windows within a display screen, the one or  
more windows corresponding to the one or more user groups,  
respectively, and the browsing information being displayed within a  
window corresponding to the user group associated with the window, the  
browsing information within the window being delineated by user into one

or more rows such that each row corresponds to an individual user, the one or more rows ordered according to a probability of a behavior based on a location of a user within a group.

Please replace **claim 45** with the following:

Claim 45. A method that displays web traffic, comprising:

receiving web site user clusters that were generated through one of zero-order and first-order Markov models, respective clusters including information related to one or more web pages accessed by one or more users who display similar web browsing characteristics;

creating individual graphical user interfaces for each cluster;

visualizing the cluster information within one or more rows of an associated graphical user interface; and

sorting the one or more rows according to a probability of a behavior based on a location of a user within a cluster.

Please replace **claim 57** with the following:

Claim 57. A system that facilitates visualization web site activity, the system comprising program modules embodied on a computer-readable storage medium that facilitate:

means for clustering web site activity information according to web site user behavior;

means for displaying the clustered web site activity information in respective windows;

means for presenting the web site activity information within respective windows based on similar user browsing behavior; and

means for delineating the web site activity information into one or more rows within the respective windows, each row represents an individual user of the web site, the respective rows associated with an intensity level indicating a conditional transition probability of a zero-order or a first-order Markov model.

### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: All pending claims 28, 29, 33-46, 48-50, and 52-57 have been carefully considered.

The present invention is directed towards a system, method, and computer readable medium for visualizing web site activity traffic.

Independent claims 28, 45, and 55 recite the limitation "the one or more rows ordered according to a probability of a behavior based on a location of a user within a group". A prior art of record, Papierniak et al. (US 6714931 B1) teaches browsing information within the window being delineated by user into one or more rows such that each row corresponds to an individual user. However, Papierniak fails to disclose ordering the rows according to a probability of behavior based on a location of a user within a group. Further search of the prior art resulted in no references that teach such a

limitation. Therefore independent claims 28, 45, and 55, and all dependent claims 29, 33-44, 46, 48, 49 are allowable.

Independent claims 50 and 56 recites having intensity levels to indicate probability of a user visiting a type of web page and independent claim 57 recites intensity levels indicating a conditional transition probability of a zero-order or first-order Markov model. Upon a detailed search of the prior art, no references were found to display intensity levels while visualizing web site activity traffic. Therefore independent claims 50, 56, and 57, and all dependent claims 52-54 are allowable over the prior art.

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
